### **AIM of Industrial Visit**

Industrial visit is considered as one of the tactical methods of teaching. The objective of an industrial visit is to provide the students an insight regarding the internal working of companies. Today, we all perfectly understand that theoretical knowledge is just not enough for a successful professional career. It is here that by going beyond academics, industrial visit provides students a much relevant practical perspective of the actual workplace and the larger world of business. All this makes the importance of Industrial visits all too evident.

### **Details of the Industrial Visit**

The students gathered in the college at 9:00am in the morning and were briefed about how the day was going to be spent. The students and the faculties left for MIHAN at 9:30 am and reached at 10:15am on the gate of MIHAN where the passes into the SEZ were checked for all and were allowed inside the SEZ. Then all of the students and faculties were given a special visitor pass at the entrance of Infocepts which created a sense of excitement in the students as it gave a feel of an employee in the company. As soon as they entered the office they were taken to a meeting room where Mr. Jay Padwekar who was the HR associate at Infocepts gave a brief about the company and its working. The students got an idea of what all things are needed to work in an IT company like theirs. A very nice question answer session was followed after the brief Introduction to the company, where the students cleared many of their doubts and also gathered a lot of information which they would benefit from in the near future while applying for jobs.

After the introduction and question answer session Jay took us for an office tour where he showed us the working culture of the office and also how the wonderful interiors of the office were designed so as to create a healthy working environment for the employees. The office had a play area, massagers, restaurants, and food stations all over which was created with a sole purpose of making the employees feel at home and relax in between their work timings. There were different types of meeting rooms, some inside a bus, some inside a taxi, some on scooters etc. Seeing all this the students were very motivated to work in a company like this. The students were also set free by them to take as many photos as they wanted. The students also enjoyed that

bit. After some time the students were also served with refreshments in their restaurants which were centrally located inside the company. Students even got to meet some of the employees who are working there and got a chance to interact with them. This whole experience imbibed a very positive impact on the students which was in fact the sole motto of the visit.
