Plan for weak students:

For improving the performance of weak students, we planned to conduct the remedial classes on every Saturday for one hour on different topics of computer awareness and discrete mathematics. We also planned to conduct shorter test and long test. By mentoring process we will keep track on their performance.

Plan for strong students:

For improving the quality of strong students we planned to shine these students in University merit list. For achieving this we are planning to give them to solve the previous year University question papers, to conduct the doubt sessions, to give extra questions on each unit as assignment and keeping track on their performances.
