- The pros and cons of the online education
- Traditional education is always better than online education
- It gave a way to express our opinions and listen to others as well
- It boosted my confidence

- Both sides argued well. Fully understood the gist of the burning issue
- Lastly knowledge is important whether classes done online or offline
- Online education can be made a viable substitute for traditional education
- It was really good to see online education competition as the first one ever

- online education should not replace as it gives convenience to students and education does not accept convenience
- The remarks of the judges and new thinking of my friends
- Deep insight into pros and cons of online education...and different view points
- None
- The online education is a practice but not a Norm to gain all knowledge from, it has its own limits and restrictions.
- Encourage knowledge and skills
- Learn that I should work on my communication skills.
- This website is the best

Provide if any, suggestions for improvement in future workshops.

- Please specify students with all rules from next. This was my first debate and there were many rules I got to know. Please tell rules specifically. Using notes is unethical was not told to us at all.
- please notify us at least before a week so it would give us more time to prepare
- It was the best option now a days. So I don't think there is any need of improvement
- We can play a ring at 4 minutes to know that time is running. Even after practice we don't realize.
- So nicely conducted thank you respected faculty members..We are looking for more such competition.
