Department of Statistics

Students' Seminar (2021-22)

Seminars were organized for the students of B.Sc. I on 16.12.2021 and B. Sc. III on 21st Nov, 2021. For seminars of B. Sc. I and III the students chose certain topics from their syllabus. They formed groups each consisting of 4 to 5 students with one of them working as their Group Leader. They were also suggested some books for reference and given few tips. Due to COVID 19 pandemic the seminars could not be held in the college auditorium. Therefore, the teams prepared Power point presentation of their topic and presented the same online on Google meet platform. It was observed that the Power point presentations prepared by the students were very elaborate using the latest computer techniques available to them.

These seminars helped the students to understand the topic in a better way. This also gave them an opportunity to present their work online, which most of the students did for the first time. This will definitely help them in their future career. It was found from the past experience that the students who gave seminars could do better in their written university examination. Overall response to Students' Seminars was overwhelming.

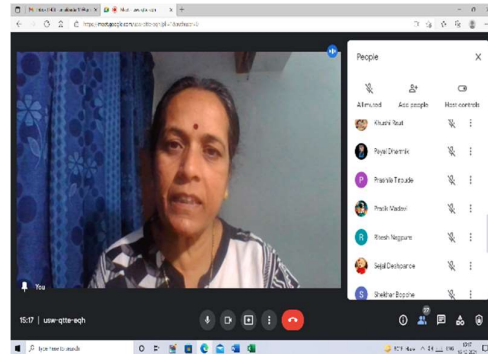

Seminars by students of B. Sc. I (Dt. 16/12/2021)

Group No.	Name of Topic	Group Leader	No. of Team Members
1	Diagrammatic and Graphical Representation of Data	Ms. Durgeshwari Kachawah	5
