Online Social Awareness Program

On

COVID-19 vaccine production, how it works and misconceptions about vaccination

Organised by

Social Outreach Cell, Dr. Ambedkar College, Deekshabhoomi, Nagpur

REPORT

Social outreach cell, Dr. Ambedkar College, Deekshabhoomi, Nagpur had conducted an online social awareness program on the topic- **COVID-19 vaccine production, how it works and misconceptions about vaccination** on 14th June 2021 at 3.00pm to 4.00pm via Google Meet. The resource person for the lecture is Mr. Pradip Hirapure, Assistant Professor, Dr. Ambedkar College, Deekshabhoomi, Nagpur.

The COVID-19 pandemic has led to a dramatic loss of human life worldwide and presents an unprecedented challenge to public health, food systems and the world of work. The economic and social disruption caused by the pandemic is devastating. The pandemic has been affecting the entire food system and has laid bare its fragility. Border closures, trade restrictions and confinement measures have been preventing farmers from accessing markets, including for buying inputs and selling their produce, and agricultural workers from harvesting crops, thus disrupting domestic and international food supply chains and reducing access to healthy, safe and diverse diets. The pandemic has decimated jobs and placed millions of livelihoods at risk. As breadwinners lose jobs, fall ill and die, the food security and nutrition of millions of women and men are under threat, with those in low-income countries, particularly the most marginalized populations, which include small-scale farmers and indigenous peoples, being hardest hit.

Now is the time for global solidarity and support, especially with the most vulnerable in our societies, particularly in the emerging and developing world. Only together can we overcome the intertwined health and social and economic impacts of the pandemic and prevent its escalation into a protracted humanitarian and food security catastrophe, with the potential loss of already achieved development gains.

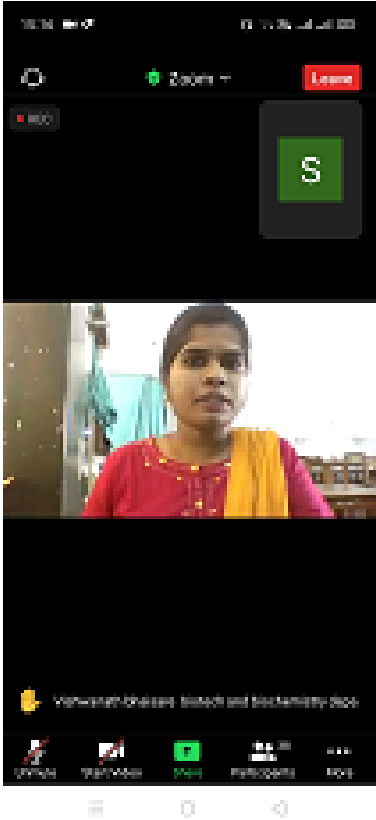

In order to do so the first and the foremost step is vaccination. But now also there are some misconceptions about the vaccination amongst people in India. They are unaware of the production strategy, the working of the vaccine in an individual and therefore they hesitate to take these vaccines. To spread awareness amongst all this webinar was conducted.

The webinar started by offering prayers to Tathagat Gautam Buddha and Parampujya Dr. Baba Saheb Ambedkar and with the welcome speech by the Principal of the college Dr. B. A. Mehre. Total 80 participants were present in the program. The resource person of the event Mr. Pradip Hirapure beautifully explained the whole process of vaccine production and its mechanism of working inside our body. He explained how efficient the vaccine – Covidshield and Covaxin are. He explained the

need of vaccine in current scenario and how the risk can be reduced after getting vaccinated. He ended his lecture with a beautiful poem composed by him on corona virus.

The program was hosted by Ms.Rohini Meshram, Assistant Professor, Dr. Ambedkar College, Deekshabhoomi, Nagpur. The co-ordinator of the program was Mrs. Shweta Paranjape, Assistant Professor, Dr. Ambedkar College, Deekshabhoomi, Nagpur. Other members of the Cell are Mrs. Priyanka Soitkar, Mrs. Shama Khan, Ms. Swati Chimurkar, also attended the session. Other department faculties, teaching and non -teaching staff members also attended the session.
