TREE PLANTATION IN THE MEMORY OF LATE Dr.S.K.BISWAS

Trees contribute to the **environment** by providing oxygen, improving air quality, climate amelioration, conserving water, preserving soil, and supporting wildlife. They also are important part of every community, our streets, parks, playgrounds and backyards when lined with trees create peaceful, aesthetically pleasing environment. They increase our quality of life by bringing natural elements and wildlife in the urban environment and this is acknowledged in the Governments Sustainable Development Strategy.

Throughout the world, about **900 million trees** are cut down annually, **Twenty nine million, eight hundred thousand trees** (29,800,000) are cut down every day in the world. Annual tree mortality ranges from 1 to 3%, so approximately **14,000-45,000** of these trees will fall every year. About **50,000 trees** should be planted every year in the study area to ensure that the city's tree cover does not fall below its current level.

In order to create awareness amongst youngsters, Dr. Ambedkar College Deekshbhoomi, Nagpur has conducted tree plantation programme in the memory of Late Dr. S. K. Biswas, former H.O.D of the department of Biochemistry and Biotechnology on 20th July 2019 . All the faculty members as well as students of department participated enthusiastically in the programme and planted different flowering, medicinal and ornamental plants.

Valuable efforts taken to organize above programme by Prof. B. A. Mehere, H.O.D, department of Biochemistry and Biotechnology and all the teaching and non teaching staff.

"Trees exhale for us so that we can inhale them to stay alive. Can we ever forget that? Let us love trees with every breath we take until we perish."

— Munia Khan
