NOTICES

REPORT

Students who have been admitted in first semester of CBZ and BCZ are called upon for an small interaction program in the Zoology department at 12 am. All the departmental teaching and non teaching staff could not be present at the same time so a presentation was prepared for letting the students know about the faculty and the department to be introduced to the newly admitted students in the zoology laboratory. Dr RS Bagade chaired the function being the head and the departmental people were introduced to all. Dr AA Meshram spoke about the disciplinary aspects in elaboration. Dr DVNS Suresh later with the help of a brief presentation demonstrated about the infrastructural and functional aspects about the department. The syllabus; the pattern of course and the examination pattern were presented before them by him. He then made the students feel easy with subject and faculty by some of the interesting facts of zoology. Dr Bagade concluded the program with a happy note of their three-year happy stay in the department
