

NOTICE of the PROGRAM (Seminar on Communicative English Learning)

Intimation was circulated among the semester wise groups on social media

ECGC-DACN Initiative
A Movement : Learning Language called ENGLISH

Our Paramount Goal
Develop the HABIT of reading, stimulating incisive arguments through newspapers about the world around you. A great newspaper should suffice to fulfill this requirement. We initiate the program that will make you read the newspaper everyday where we'll train you to share with you the details of how arguments are formulated and how to break and counter various types of arguments. Since the newspaper is in English, we hope that over a period of 3 months great results can be engendered in an individual with respect to speaking, thinking and formulating arguments in English. There are infinite ways that an opinion or information can be put in front of you. This is called an argument.

A newspaper is a collection of various articles written by various authors where every article is like an argument put forth by their respective authors. Therefore, the more arguments or articles you read, more becomes your understanding of how language works in a dynamic manner in multitude ways through the use of imagination, patterns of sentence construction and vocabulary gets etched in your mind because you are reading everything in the English language. And we have to give preference to English since all languages of the world get translated into English only. So if you master one language you can basically read all the languages of the world since their English translations are available. Hindi, Marathi or any other regional languages do not possess this privilege.

Current affairs and your understanding of the world improves as well with time. The only way to master any language is to read a lot of it over time. This is what we hope to achieve in the coming days. The class can only be joined for a minimum period of 3 months since we want to make sure that the scope of the activity of reading becomes an everyday HABIT.

This is an effort by DACN to provide you all interested candidates an opportunity to prepare out of yourself a mature graduate with an apt understanding of idea-expressive skills towards improved employability & making a better example of forthcoming innovators for sure.

Thanks and all the very best wishes to be a part of this DACN-Initiative towards learning the language called English.

Classes from 13.03.2023, 8am

Dr DVNS Suresh
