Report on Student Awareness Program on MOOC Courses by SWAYAM and NPTEL for Career Advancement

The Department of Biochemistry & Biotechnology conducted a Student Awareness Program on MOOC courses offered by SWAYAM and NPTEL for M.Sc. Biochemistry and Biotechnology and B.Sc. final year students. The program aimed to introduce students to the benefits of Massive Open Online Courses (MOOCs) and how they can leverage these online platforms to enhance their knowledge, skills, and career prospects. The session took place on 28th July 2023 at 2:00 PM and was attended by enthusiastic participants eager to explore new learning opportunities.

The primary objective of the Student Awareness Program was to create awareness among students about the significance of MOOCs and the value they add to their academic and professional journey. The program aimed to encourage students to utilize these platforms to acquire specialized knowledge, strengthen their skill set, and gain a competitive edge in their respective fields.

The program commenced with an introduction to SWAYAM (Study Webs of Active-Learning for Young Aspiring Minds) and NPTEL (National Programme on Technology Enhanced Learning). Mr Rohan Thaware Asst. Prof. and SWAYAM mentor of college explained the scope and structure of these online learning platforms, emphasizing the diverse range of courses offered by leading universities and institutions.

He highlighted the advantages of MOOC courses, including flexibility in learning, self-paced study, access to quality content from renowned educators, and the ability to learn from the comfort of learner's homes. Students were encouraged to explore courses beyond their syllabi to broaden their knowledge base.

Mr. Thaware guided students in selecting appropriate courses aligned with their interests, academic pursuits, and career goals. Information about course certification, course duration, and evaluation methods was provided, inspiring students to commit to their chosen courses. The program emphasized how MOOC certifications can add value to students' resumes and LinkedIn profiles, making them stand out to potential employers during job searches or higher education applications. Students were made aware of the potential career advancement opportunities that arise from showcasing additional skills and expertise.

The Student Awareness Program on MOOC courses conducted by SWAYAM and NPTEL was a resounding success. The participants expressed enthusiasm and keen interest in exploring online learning opportunities to augment their educational journey. The Department of Biochemistry & Biotechnology remains committed to supporting students in their pursuit of continuous learning and career advancement, and will continue to organize such informative programs in the future.
