### **Department of Physics**

The Department of Physics at Dr. Ambedkar College, Deekshabhoomi, Nagpur, successfully conducted a Guest Lecture on 25 September 2024. The lecture on moral and ethics, tailored specifically for undergraduate students, provided a clear and insightful exploration of these essential concepts. Ethics and morality are crucial for guiding human behavior, particularly as students navigate academic life, social interactions, and future professional environments. This lecture aimed to introduce key principles, explore different ethical theories, and encourage students to apply these ideas to real-life situations.

He started his lecture initially by explaining a mood meter. To explain this topic, he showcased a slide on projector which shows four quadrants of four different colour. By choosing a colour of one's choice, one can find to which mood he/she belong to. Yellow colour was given to the first quadrant which shows happiness and the guest explicitly explained how we can achieve yellow colour of our mood.

Then he showed three quotes of three different personalities, like Sir Albert Einstein and Dr. Ambedkar and asked students about the common thread about them. He replied that all the personalities were blessed with great mind and a great thinking which transformed the world positively and effectively.

The speaker then explained the chain of our life by showing the hierarchy of thoughts to destiny. According to him our thoughts gives us words, words are responsible for actions, actions then turn to habits, habits makes a good character and character shapes the destiny.

The lecture on moral and ethics provided undergraduate students with a foundational understanding of key ethical theories and concepts, helping them reflect on how these ideas apply to both personal and professional life. As students grow and face challenges in their academic journey and beyond, ethics will serve as an essential guide for making responsible choices, building strong relationships, and contributing positively to society. The lecture

## Dr. AMBEDKAR COLLEGE, DEEKSHABHOOMI, NAGPUR Department of Physics

emphasized the importance of reflecting on one's actions and striving to act with integrity in all areas of life.
