Help the Blind Foundation, Chennai

Programme: Smart Vision Glass Distribution to Visually Impaired Student

Date: 25 January, 2025

Sanvedana Inclusion Education Cell of Dr. Ambedkar college , Deekshabhoomi, Nagpur & Help the Blind Foundation (HTBF) organized a distribution event for smart vision glasses at Theri Sanghmitta Hall on 25th January 2025, at 11:00 am. The objective of the program was to improve the capabilities of both blind and visually limited students by delivering them adaptive technological tools that would enhance their learning process as well as their everyday capabilities.

The programme started with a talk by the Chief Guest and Alumni of the College Mr. Gajanan Pawar. He stated the importance of technology and its practical application in routine lives of people. Further he addressed the utility of the Smart Vision Glasses and as a response students showed up immediate interest in these glasses that give them newfound independence which helps them engage better in their academics and move around more freely. Dr Mrs. Bhumi

Mehere, The Principal, DACN underlined at the event that inclusive education must offer equivalent opportunities to all students. Shri Rajamani, Volunteer, HTBF, during his speech stands as a support for visually impaired individuals and guided them for further technological advancement for the visually impaired Further he specially mentioned that HTBF have given Rs 7 Lac as mobility fund for The Distribution of the Smart Vision Glasses for the visually impaired students. Later on, Mr. Dhiraj, HTBF volunteer conducted a demonstration that explained the glass function before giving them to students for use. Further he explained that students can take benefit from the features on their smart vision glasses which enable them to receive text-to-speech voice assistance for reading and object recognition and navigation help along with voice command functionality to enhance their independent interaction within their environment.

In Collaboration with Help The Blind the Foundation The College has also made plans to enhance its adoption of assistive technologies that improve accessibility for visually impaired students across the school campus. The number of beneficiaries for the Smart Vision Glasses were 20 .The Programme was attended by the teaching faculty of the college and more than 30 students have attended the programme .
