World Ozone Day- 2023

Intercollegiate Poster Competition

Organized by
Department of Chemistry

The Chemistry Department of the college has organized World Ozone Day 2023 on 16th September 2023 at Dr. Ambedkar College Deekshabhoomi, Nagpur. On this occasion Chemistry Department has organized Poster Competition. The theme of poster competition was “Fixing the Ozone Layer and Reducing climate change”.

The Principal of the college Dr. Mrs. B.A. Mehre has chaired this function. Dr. V.M. Shivankar, Professor Department of Chemistry was the Program Coordinator. Faculties of the Department and more than 200 Chemistry students were attended the celebration program of World Ozone Day 2023. Dr. Mrs. B.A. Mehre has given welcome address.

More than fifty students were participated in this Inter Collegiate Poster Competition. Students from Shivaji Science College, Nagpur, Mohota Science, Dharampeth Science College and Hislop College Nagpur and the students of Dr. Ambedkar College Nagpur were participated in this competition.

Dr. V.M. Shivankar, Program Coordinator of the program, in his introductory remark cover all points regarding Environmental imbalance, said that environmental & Health Aspects of Stratospheric Ozone layer Depletion. Also explain importance of the Ozone layer. Ozone layer is a stratosphere which is layer of atmosphere around the earth. Colour of layer of atmosphere can be seen from interaction space station.

He also explained about Ozone which is highly reactive form of oxygen. O_3 exist in both Tropospheric and Stratospheric zones of earth atmosphere and how there is formation of ozone in Troposphere has shown highest ozone level recorded at various place in India. He focusses on Health effect of Tropospheric ozone. There is formation and Depletion of O_3 layer 5.48 min.

Students in their posters has shown of ozone layer Depletion which was very informative. Overall ozone layer is around the earth. Average thickness of ozone layer is 300 Dobson unit or 30 mms thick. He explained cause of degeneration of Ozone of Ozone layer. The rate of breakdown is faster than the formation therefore it layer becomes thin. CFCs, BrFCs Nitrous oxide deplete the Ozone layer, these are widely used electronic instruments in AC, Fridge, Car etc. Chemical reactions of CFCs deplete the Ozone layers.

Students also suggested the remedies through their posters on how to solve problems of Ozone destruction. He has given the statistical data and up to 50 percent destruction of CFC by 1918. He explained the impact of Ozone layer depletion causes Skin cancer and genetic damages. UV radiation in sun light and Health impact of UV radiation on human life. Finally, he said that Ozone hole is responsible to climate change and Global warming.

After his very informative lecture, Dr. V.M. Shivankar has given the vote of thanks. All Chemistry faculties Dr. D.Y. Panhekar, Dr. N.G. Telkapalliwar., Dr. Mrs. D.M. Borikar, Dr. Sawant and Prof. Parag Panse has attended this program. More than hundred and fifty students have attended this guest lecture.

First prize goes to Ms. Masum Meshram of Shivaji Science and Asawari Kasare and Payoshini Gurao of Dr. Ambedkar college Nagpur. Second Prize winner was Ms. Sakshi Sonawane of Mohota Science College Nagur and Pradnya Wasanik of Shivaji Science College Nagpur. Third Prize winner are Shikha Yadao, Dharmapeth college, and Suman nayak and Renuka Dharapur of Dr. Ambedkar College Nagpur. Prize distribution ceremony was conducted by the hand of Dr. Mrs. B.A. Mehere madam Principal of the College.
